

Georgia Tech West Campus Dining- Atlanta, GA

EDUCATION DESIGN SOLUTIONS

Known for our innovative design, efficient engineering, and professional service, W&A Engineering is the trusted partner of both K-12 schools and universities across the United States.

The expertise of an educational institution's design team during development is vital to the long-term success of both the institution and its students. As with any project, the efficiency of typical building blocks such as utilities, parking, circulation, stormwater, and landscape design are crucial; however, the W&A Engineering team knows that the emotional environment and sense of place are uniquely crucial to the spirit of an educational institution. Because we believe that building better communities often starts in the classroom, our design teams take special care when working within the education industry to ensure future generations have the infrastructure they need to learn and grow efficiently.

W&A Engineering provides a full range of services within the education industry. Whether designing pedestrian systems, athletic complexes, traffic circulation systems, learning greenspaces, parking lots, or entire college campuses, our team has extensive experience working on successful education projects across the country. Whether our clients are planning an expansion of an existing space, accommodating growth, or designing a whole new campus, W&A's experienced team provides comprehensive total development solutions which includes surveying, site planning and design, master planning, permitting, construction plans, discipline coordination, and construction administration.

UGA College of Vet Med Traffic Design- Athens, GA

NC State University Club Tennis Complex- Raleigh, NC

TOTAL DEVELOPMENT SOLUTIONS

INNOVATIVE, CREATIVE, AND EFFICIENT SITE DESIGN

The civil engineering team at W&A Engineering provides the most efficient and economical education design solutions available on the market in order to meet our clients' needs while also satisfying the needs of stakeholders. From concept studies through final engineering and construction, W&A utilizes a mix of creative and analytical engineering along with decades of real-world experience to efficiently move projects from inception to completion. With a project portfolio spanning 46 states and counting, we've had the pleasure of working with educational institutions all across the country to successfully design their campus and facilities. From renovations and expansions to new, innovative design, our team provides total development

solutions and industry-informed project support throughout the entirety of our projects' lifecycles.

Every client's main priority is optimizing their return on investment, which is why W&A tailors each service package to meet our clients' exact development needs, while keeping their project both on time and on budget. With land surveying, landscape architecture, and civil engineering services all in-house at W&A Engineering, our team leverages our decades of experience designing beautiful and functional learning spaces to ensure that the next generation of students, teachers, and auxiliary staff are able to learn and thrive in spaces both aesthetically and technically conducive to learning.
