PARKS AND RECREATION DESIGN

Known for our innovative design, efficient engineering, and professional service, W&A Engineering is the trusted partner of community leaders and developers driving sustainable growth throughout the United States.

At W&A Engineering, we know that plazas, parks, recreational areas, and greenspaces do so much more than add aesthetic value to our communities. They create opportunities for human connection, provide spaces for fellowship and gathering, enhance a community's sense of identity, and so much more. From parks, campuses, streetscapes, trails, plazas, greenspaces, leisure areas, and more, we use our decades of design expertise to bring man-made elements into harmony with the natural environment. Our team of talented design experts enhance site environment, resolve design challenges, and enhance project value.

The expertise of a landscape architecture and civil design team during site planning and development is vital to any project's long-term success and community impact. For this reason, W&A Engineering provides a full range of design services for our clients across the country. From master planning to graphic services to planting, amenity, and entrance design, and more, W&A's professional design staff includes landscape architecture experts who work alongside our civil engineering and site development teams, utilizing ecologically sound and sustainable planning principles to design award-winning spaces that are as beautiful as they are functional.

TOTAL DEVELOPMENT SOLUTIONS

INNOVATIVE, CREATIVE, AND EFFICIENT SITE DESIGN

The planning, landscape architecture, and civil engineering teams at W&A Engineering provide the most creative, innovative design solutions available on the market in order to meet our clients' needs while also satisfying the needs of stakeholders. From initial planning through project closeout, W&A utilizes a mix of creative and analytical professional service along with decades of real-world experience to efficiently move projects from inception to completion. With a project portfolio spanning 46 states and counting, we've had the pleasure of working with communities all across the country to successfully design their parks and recreational spaces. From a one-acre pocket park to the complex design of a two-hundred-acre mixed-use subdivision, W&A provides award-

winning design solutions and industry-informed project support throughout the entirety of our projects' lifecycles.

Every client's main priority is optimizing their return on investment, which is why W&A tailors each service package to meet our clients' exact development needs, while keeping their project both on time and on budget. With land surveying, landscape architecture, and civil engineering services all in-house at W&A Engineering, our team leverages our decades of experience designing beautiful and functional spaces to ensure that the communities we serve have the resources they need to thrive and grow because we believe our clients deserve the best.
